

I have suffered with a TMJ problem for over 30 years. The TMJ specialist I went to alleviated the initial pain with splints that were changed every 2 weeks for about 3 months. Then I was on my own. My regular dentist did not suggest any other treatment or braces, he just kept capping the teeth as they broke or wore away. When I asked him about braces he said, "If it ain't broke, don't fix it." So I suffered with the pain in my jaw and the awful clicking. I finally decided to go on my own to seek an Orthodontist who could help me. After going to 5 different doctors, I was embarrassed when one of them said, "You don't have enough money to fix these teeth." So I just accepted the pain and the clicking and the sore jaw. Finally 3 years ago I received a card in the mail to try the Invisilign from Dr. Ong. I didn't know anything about it, but I went and had a consultation.

At Dr. Ong's office her staff put me at ease right away. When I met Dr. Ong, her gentle ways made me feel like I was in very competent hands for the first time in a long time. I felt very comfortable with the explanation of the product and the financing and proceeded with the treatment. I was amazed at the outcome but with Dr. Ong's guidance I knew I needed more treatment once the teeth were straight. She has begun replacing the old crowns with new ones that have corrected the clicking jaw. What a joy to have that horrible feeling in my jaw gone. Even though I am not finished yet, I have more confidence, less pain and I look forward to my appointments. I have the utmost confidence in Dr. Ong and her staff. I know that by the time all the work is complete I will be pain free and ever grateful to Dr. Ong. I suggest to everyone that they go and see Dr. Lillian Ong, the BEST DENTIST EVER!
